SKILLS

Frameworks: FastAPI, Angular
Programming Languages: Python, JavaScript, Typescript
Database: MySQL, Firebase
Styling Frameworks: CSS, Bootstrap 5, HTML5
Version Control: Git , GitHub
Tool: Postman ,Canva ,Figma,Winscp
Software Design Patterns: MVC, MVVM

EDUCATION

University College of Engineering, Nagercoil
Bachelor's Degree in Computer Science and Engineering
2018 – 2022

Projects

Youtube Video Summarizer

- Built a Python-based YouTube Video Summarizer to extract key points and generate text or video summaries.
- Used pytube for video extraction and moviepy for video editing.
- Integrated NLP models and Google Speech API for accurate text summarization.
- Developed backend endpoints using FastAPI.
- Designed the frontend with Angular for seamless user interaction.

PROFILE

Backend developer with 2.6 years of experience in building scalable web applications using FASTAPI and MySQL. Skilled in designing RESTful APIs, optimizing database performance, and implementing secure authentication. Experienced in backend architecture, API integration, and delivering efficient, robust solutions.

PROFESSIONAL EXPERIENCE

Developer

Agile Cyber Solutions | June 2022- Present

Projects:AstarPrep.co.uk

Tech Stack: FastApi ,MySQL

- Designed and implemented database architecture for an AI-driven assessment platform on AstarPrep.co.uk.
- Integrated Stripe for seamless payment processing.
- Developed APIs for user authentication and authorization using JWT.
- Implemented role-based access control with Python-FastAPI.

Projects:Seebaby.ai

Tech Stack: FastAPI,Angular

- Designed and implemented the backend for Seebaby.ai's ticketing system with chat functionality for client issue resolution.
- Developed scalable APIs for the project dashboard and notification system.
- Optimized database schemas for efficient data management and integration with Material Design datatables.

Projects:Risk Register

Tech Stack: FastAPI,Angular

- Designed and developed APIs to manage risk data, including creation, updates, and retrieval.
- Implemented reporting features to generate detailed risk analysis reports.
- Integrated data visualization tools to represent risk metrics and trends effectively.

Projects: Sustainion Web App

Tech Stack: FastAPI,Angular

- Enhanced User Authentication:
- Developed and integrated OTP-based authentication in backend systems, enabling secure and seamless login functionality while improving user experience Optimized User Access:
- Designed and implemented secure role-based access control (RBAC) with JWT token-based authentication workflows, ensuring efficient and reliable user authorization and session management.
